Time for a fresh look

The new eclipse black colour option for the AVENTOS top family of lift systems unlocks completely new design possibilities. Whether used subtly with dark surfaces or boldly against light-coloured materials, eclipse black lets you create furniture designs that are exceptional down to the last detail.

New design, proven quality

More colour options

All four existing lift system solutions in the AVENTOS top family are now available in a new dark colour, eclipse black, in addition to the classic nickel-plated finish, giving furniture designers even greater flexibility.

Freedom of design

The new colour version opens the door to even more creative ideas. Speaking of design ideas, fittings in eclipse black pair particularly well with cover caps in deep grey—but they can also be combined creatively with other colours. Cover caps can, as always, be personalised with customised branding.

Proven Blum quality

Blum's commitment to quality remains unchanged, whatever the colour of the fitting. For eclipse black, we use a special process to ensure the surface is particularly robust and resistant to scratches.

Our range at a glance

AVENTOS HF top – for bi-fold lift systems

The new eclipse black colour version opens up new design options for AVENTOS HF top. Fronts with dark aluminium frames, for example, pair perfectly with black lever arms, or you can explore other material combinations and asymmetrical front heights.

AVENTOS HS top – for up and over lift systems

Large one-part fronts can be moved effortlessly with AVENTOS HS top, while leaving adequate space between the front and the cabinet top side. The fittings are clearly visible when the front is open, so aesthetics matters: use eclipse black to add a special detail.

AVENTOS HL top – for lift ups

Lift systems with AVENTOS HL top are well suited for cabinets that are positioned above and on worktops. For instance, electrical appliances can be elegantly concealed behind a front with a worktop mounted cabinet. The accompanying cross stabiliser rod is, of course, also available in eclipse black.

AVENTOS HK top – for stay lifts

AVENTOS HK top is the ideal solution for low ceilings, as the stay lift barely protrudes beyond the cabinet, even with large, heavy fronts. With eclipse black, these solutions are now available in a dark colour option.

Transform your space

With eclipse black, you now have even more options to turn your spaces into something truly exceptional. AVENTOS top lift systems are as diverse as your customers' requirements and preferences: no matter the size of the wall cabinet, the colour you choose for the front or the living area in which it is used, there is always a suitable fittings solution. And because all types harmonise with each other, they are easy to combine.

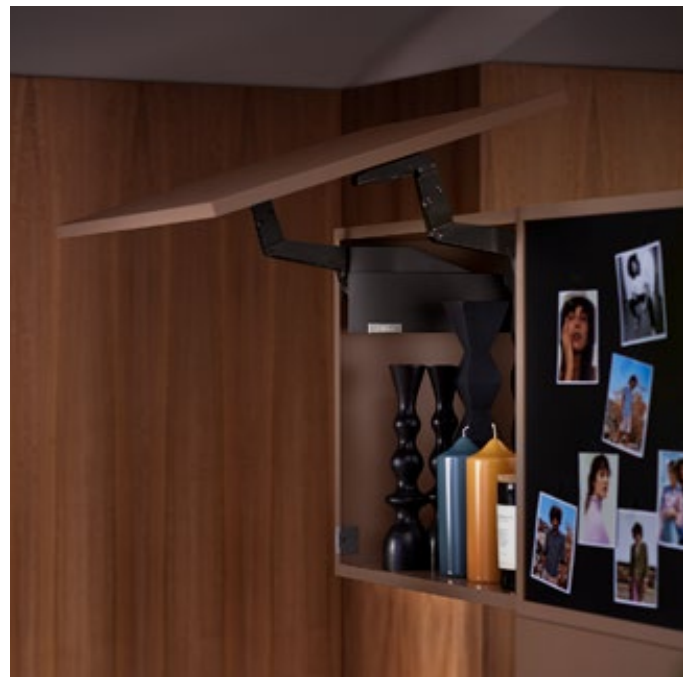

AVENTOS HL top in eclipse black is the perfect finishing for installations that call for something special.

With AVENTOS HK top in eclipse black, different materials such as glass and dark aluminium frames can be combined into a cohesive design.

AVENTOS HF top in eclipse black lends an elegant, consistent appearance to cabinets fitted with bi-fold lift systems, ideal for dark furniture designs.

AVENTOS HS top in eclipse black turns dark lift systems into a defining design detail when contrasted with light-coloured furniture.
