TANDEMBOX – efficient and simple

www.blum.com

Optimisation with immediate effect

We are continuously developing our TANDEMBOX box system. This is nothing new. But we have gone one step further: we have optimised the range and made it simpler for you. First you have to decide between an A design or T design. Both design versions are compatible with all drawer side accessories and can therefore be used in any combination. Product selection, ordering, storage and assembly are more convenient and economical. It is also possible to implement a variety of new design possibilities. For you, this means fewer parts, faster assembly, more freedom.

Drawer side in T design

Adapted and upgraded

TANDEMBOX with new colour options: we have good news for you when it comes to colour too! There are now always four standard colours for you to choose from and everything is colour-coordinated. Be it for a round gallery, rectangular gallery or inner pull-out – there is total consistency. Thanks to this refined colour range, pull-outs blend in even more beautifully with the cabinet.
For you, this means TANDEMBOX looks more elegant, which serves to enhance your furniture too.

Round gallery

– New: available in all four standard colours
– New: with colour-coordinated cover caps

Silk white

White aluminium (RAL9006)

Titanium grey

Orion grey matt

Rectangular gallery

– Consistent colour range, also available for the rectangular gallery

Silk white

White aluminium (RAL9006)

Titanium grey

Orion grey matt

High fronted pull-out: drawer side in
T design, round gallery, silk white

A small detail that makes a big difference: the round gallery and dust grey cover cap are now available in the four standard colours, namely silk white, white aluminium, titanium grey and orion grey matt. This gives you even more options when it comes to the colour scheme for your box.

High fronted pull-out: drawer side in A design, round gallery with BOXSIDE, silk white

Closed design as a highlight

TANDEMBOX with BOXSIDE: do you want to upgrade the round gallery to create a drawer with closed sides? No problem with BOXSIDE – assembly is child's play. Simply push back the cover cap on the round gallery, clip BOXSIDE on the gallery – and that's it! That's how you turn an open pull-out into a closed pull-out in no time at all. For you, this means TANDEMBOX becomes the highlight – both in the A design and T design.

Uniform and simple

TANDEMBOX with new front fixing for inner pull-outs: as convenient as can be – that was our main focus when we made changes to the range. That is why there is now a new, uniform front fixing, which is suitable for all inner pull-outs. Be it a round gallery with or without BOXSIDE or a rectangular gallery with or without a design element. This means that the front fixing for the inner pull-out always remains the same, regardless of which versions you use for differentiation.
TANDEMBOX inner pull-outs are perfect for our SPACE TOWER larder unit.

Inner pull-out: drawer side in A design,
round gallery with BOXSIDE, silk white

Inner pull-out: drawer side in A design,
round gallery, silk white

Inner pull-out: drawer side in A design,
rectangular gallery, silk white

rectangular gallery with design element, silk white

The box system with many faces

TANDEMBOX with new applications: diversity is integral to TANDEMBOX. All these and other applications can be implemented with our box systems. These are available in both the A design and T design, as shown here. TANDEMBOX is ideal not only for the kitchen, but also all other living spaces. For you, this means fresh inspiration for new furniture ideas.

High fronted pull-out (height C): drawer side in A design, round gallery, white aluminium

High fronted pull-out (height D): drawer side in A design, round gallery, white aluminium
