Digital process support during order processing

OMP EDI

Digitising your processes saves you time and money

blum

Do you want to optimise your order process and reduce costs?

We offer you services such as electronic order management and Electronic Data Interchange (EDI) to support the digitalisation of your business processes – from ordering the products you need through to issuing digital order confirmations, delivery notes and invoices. It's easy to see the benefits: faster processing, error-free data transmission and consistently high data quality. Plus, you always have an overview of all ordering activities.

Automatic checks
Different checks prevent common errors such as those when having to order left and right-handed fittings separately or when minimum quantities need to be taken into account.

Overview

Order management

Order management

With our order management system, you can always keep an overview of your orders, transmit them directly to Blum and follow their progress from start to finish.

Electronic Data Interchange (EDI)

Together, we are developing EDI for a faster, more efficient exchange of order, delivery and invoicing documents. EDI enables you to place orders directly from your ERP system, automating the entire order processing workflow.

Online order entry

Item search

Find the right items quickly using the search function or your recently ordered items.

Configurable items

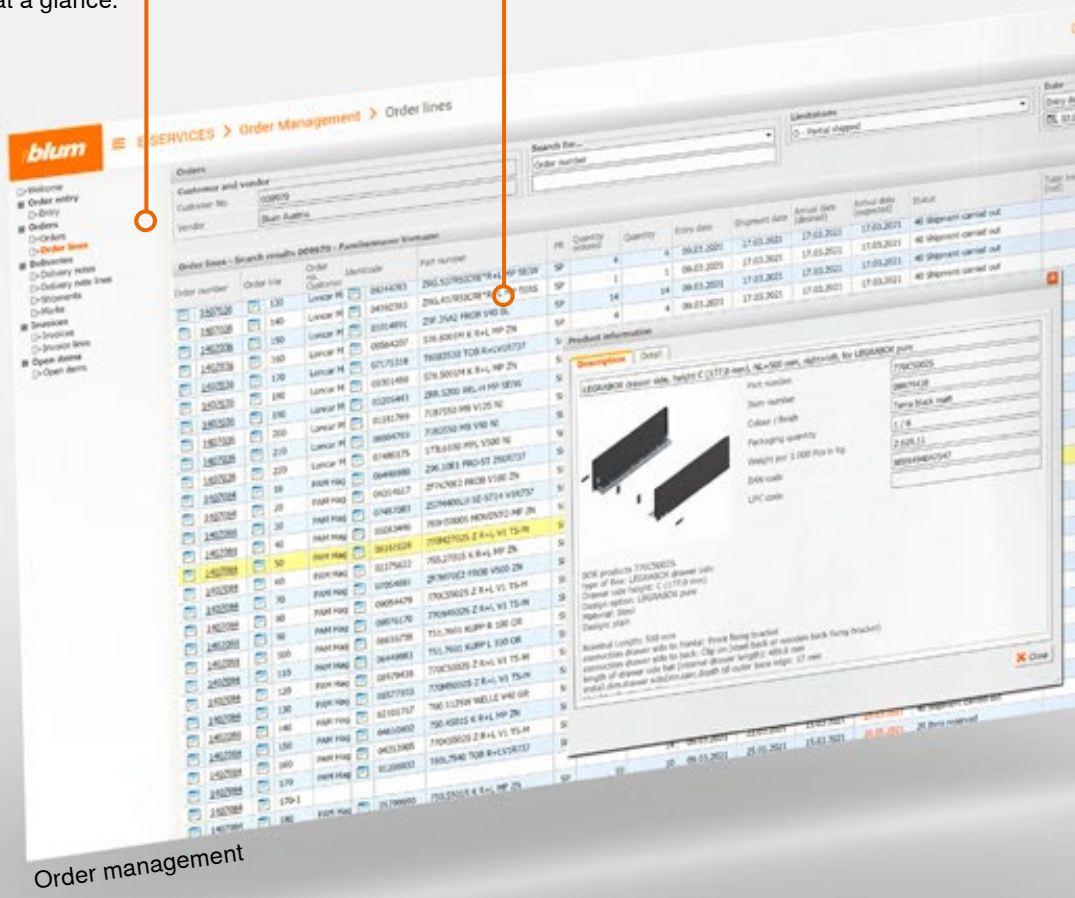

Use the product configurator to configure entire applications and add them directly to your order.
